Migrating a Virtual Machine

Name - Nikhil Dongre

Section - K21FR

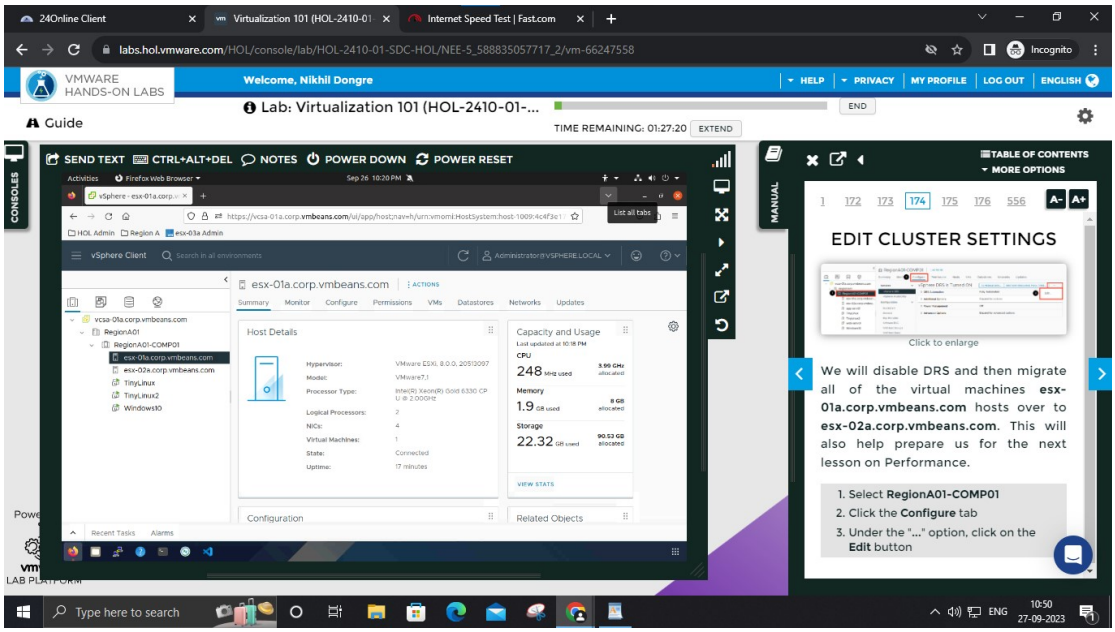
Reg. - 12107877

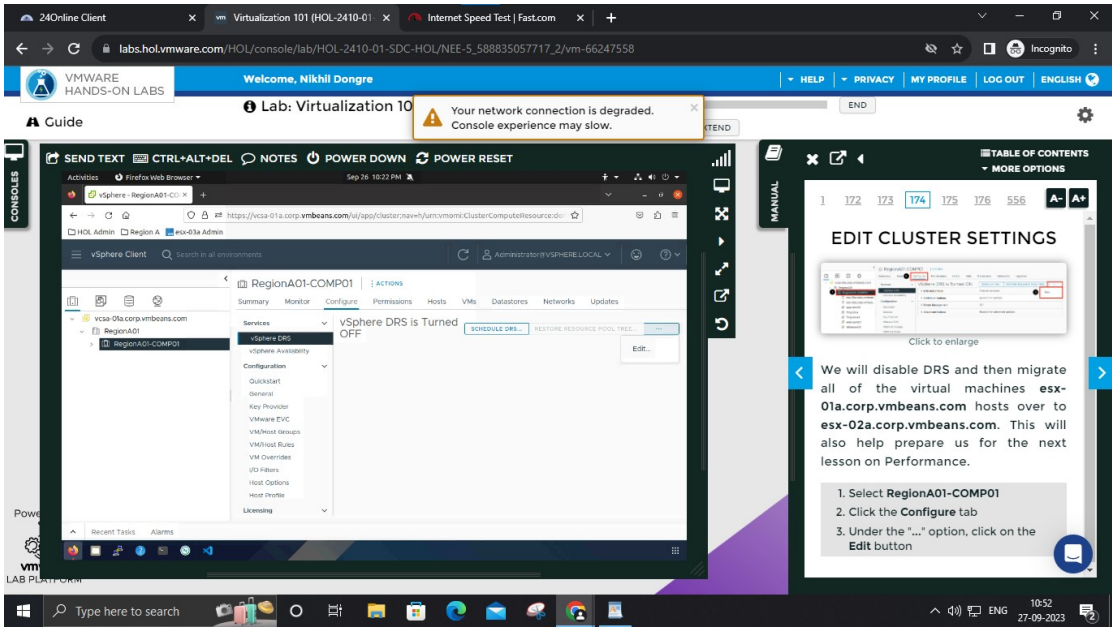
Roll no. - 1

1 Select RegionA01-COMP01

2 Click the Configure tab

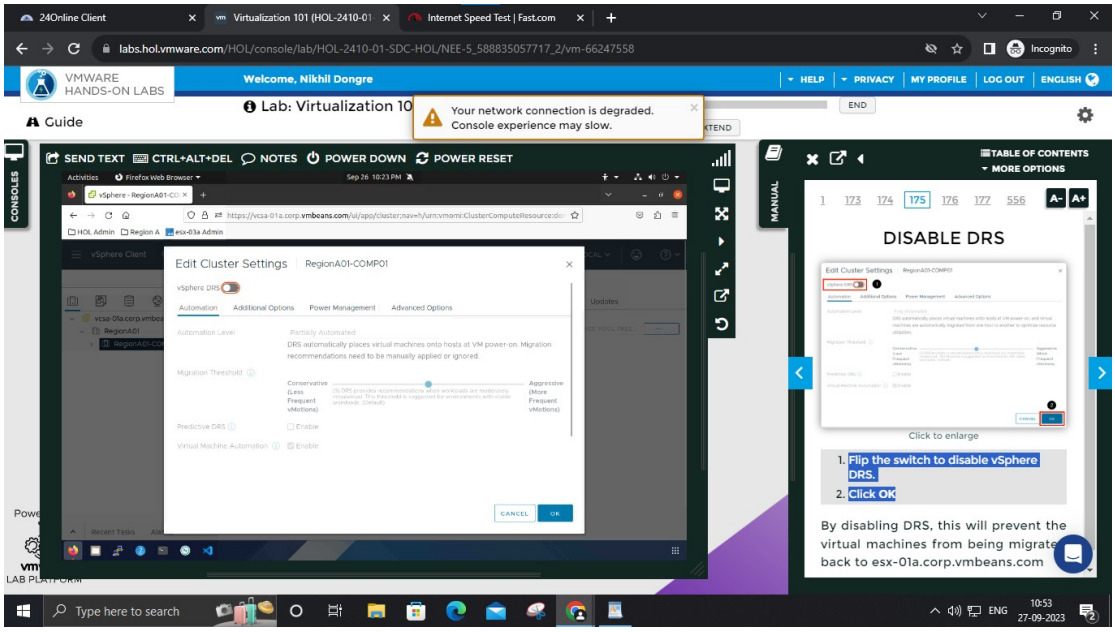
3 Under the "..." option, click on the Edit button





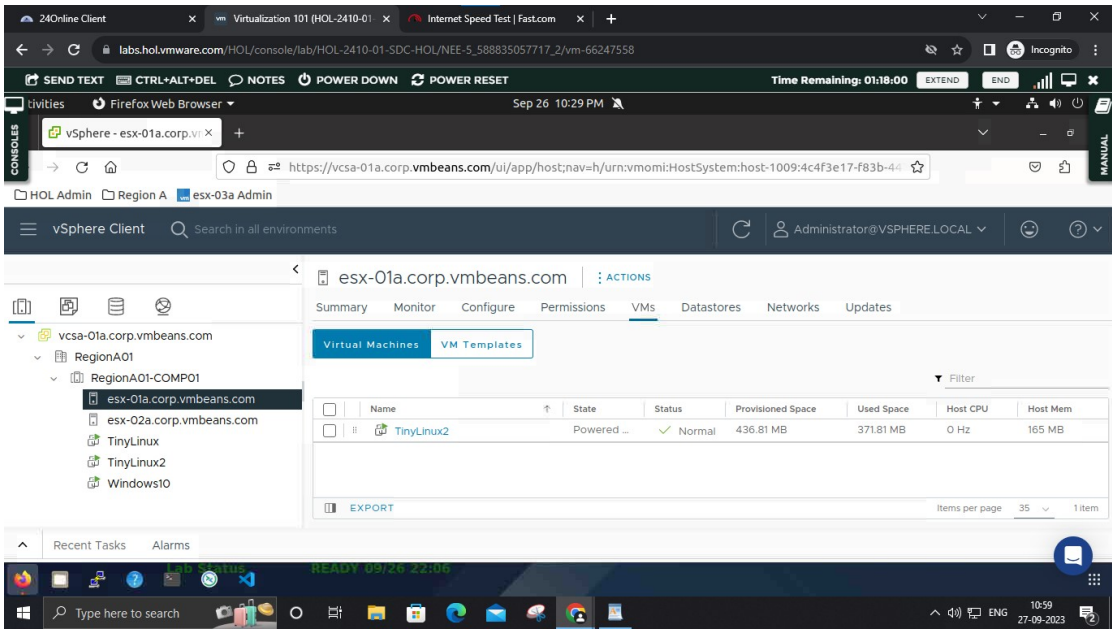
Flip the switch to disable vSphere DRS.

Click OK



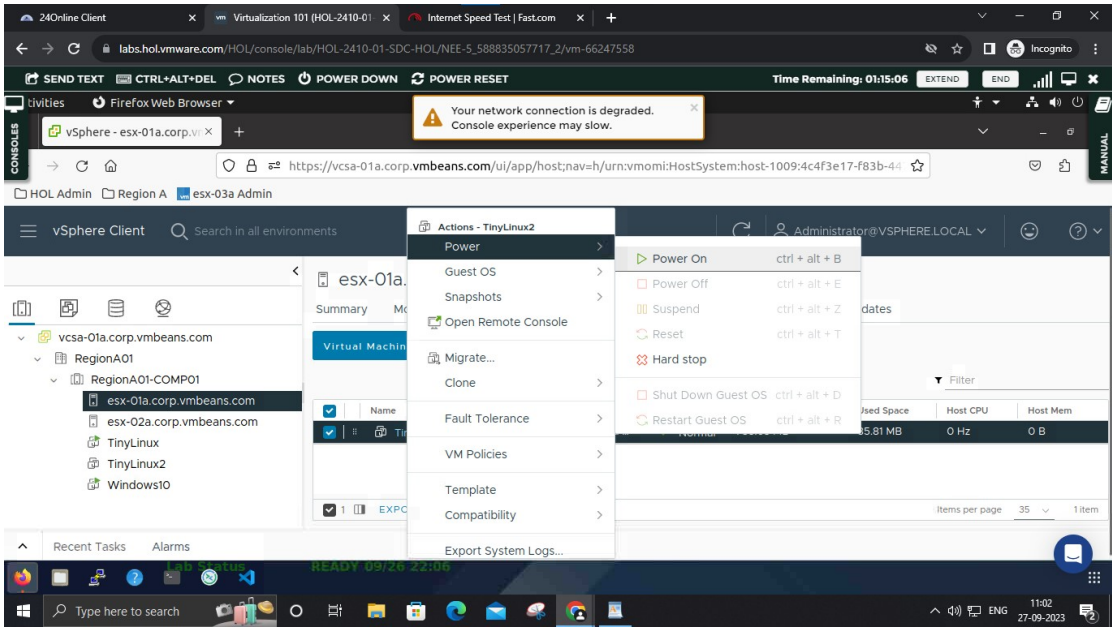
Select esx-01a.corp.vmbeans.com

Click the VMs tab



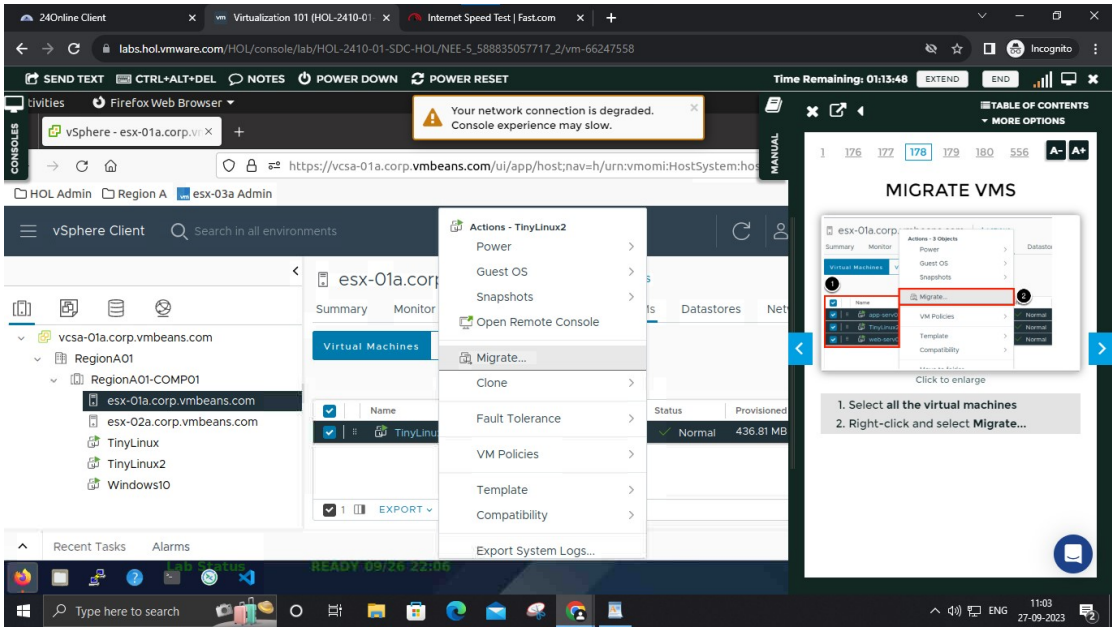
Look for any virtual machines that are Powered Off and select them. Multiple virtual machines can be selected by holding the Ctrl key and clicking on them.

Right-click and select Power/Power On

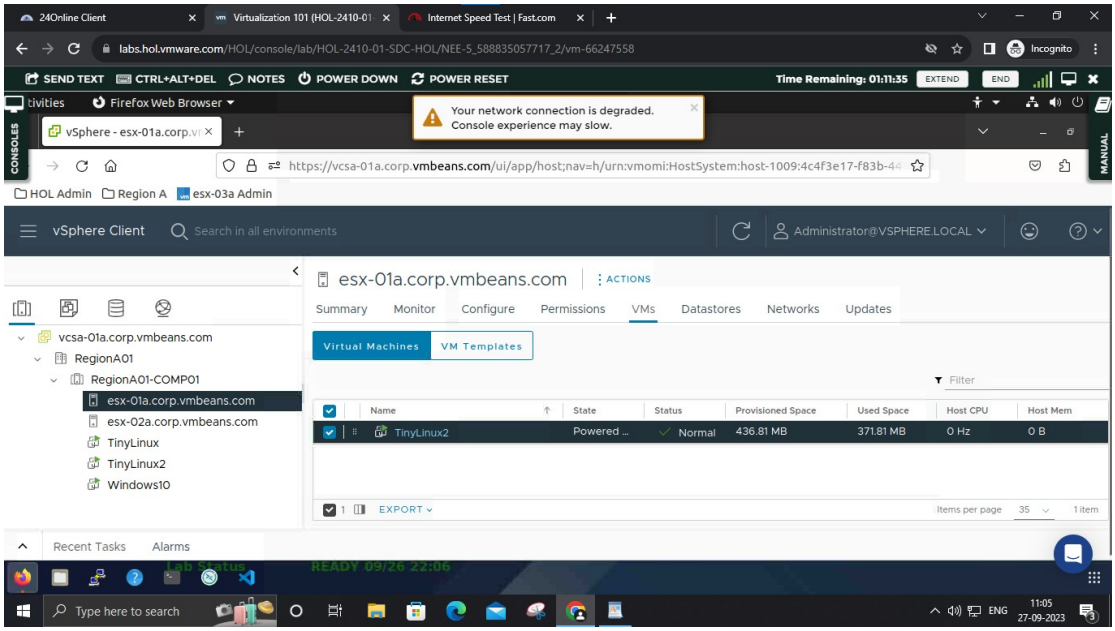


Select all the virtual machines

Right-click and select Migrate...

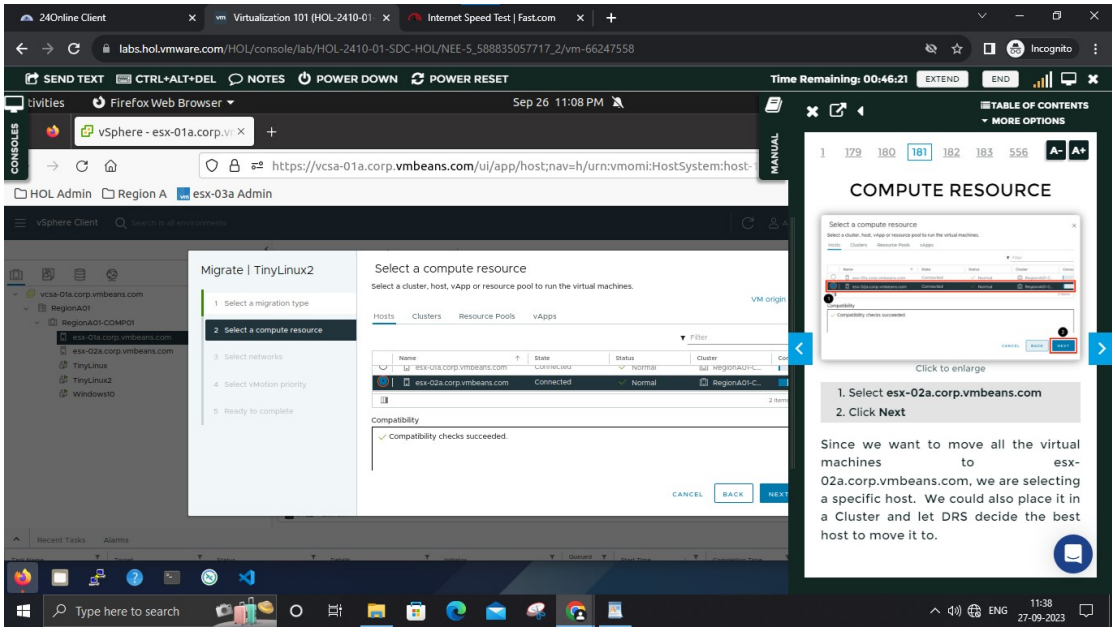


Leave the default setting and click Next



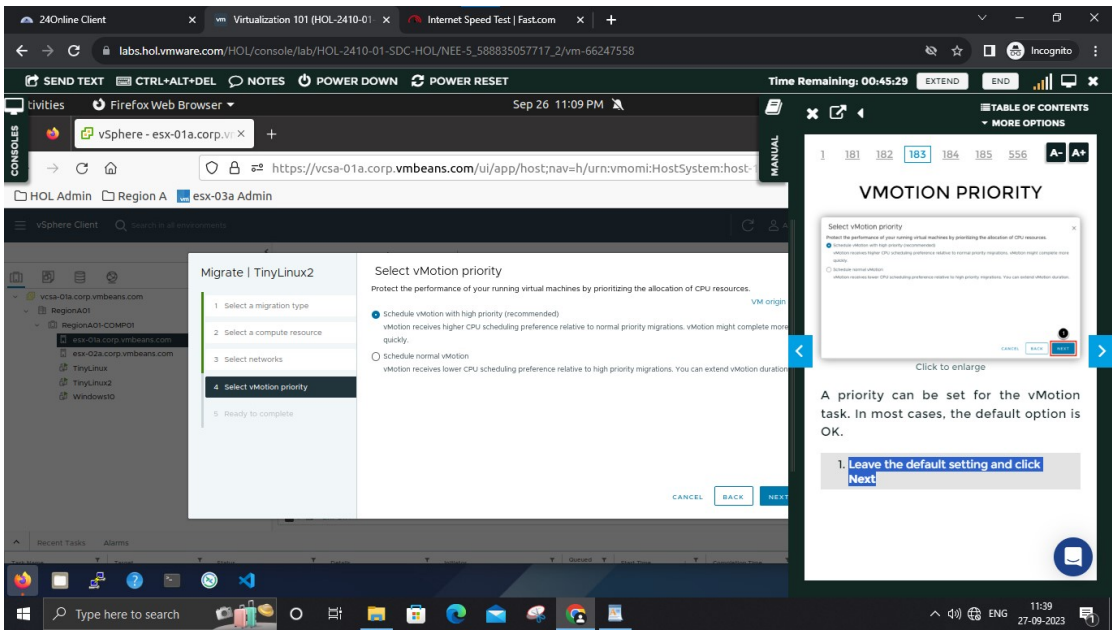
Select esx-02a.corp.vmbeans.com

Click Next

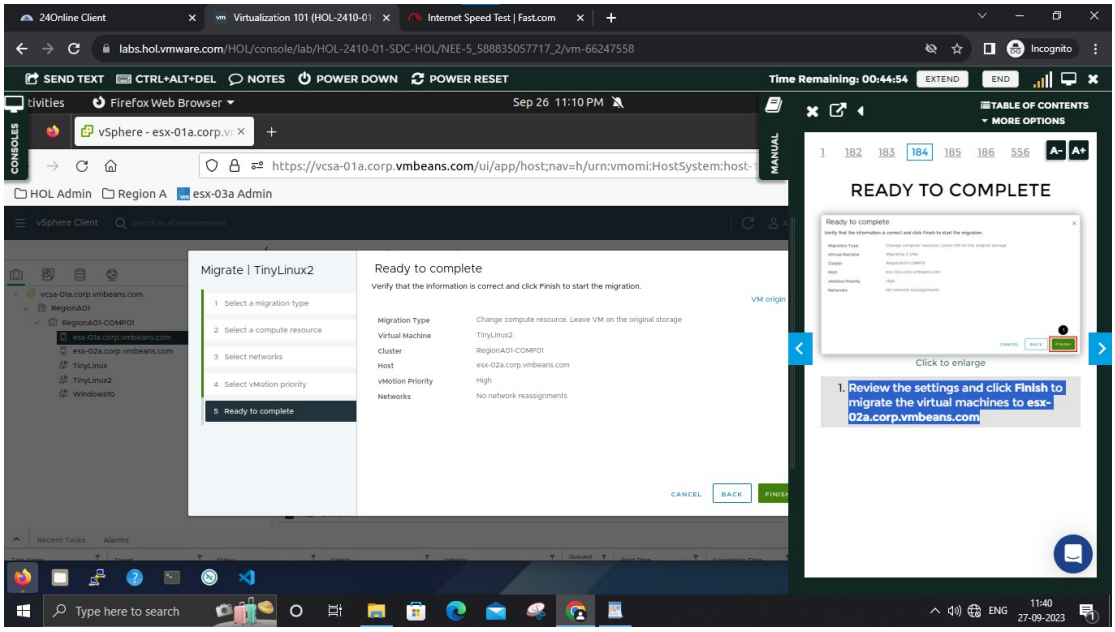


Click Next

Leave the default setting and click Next

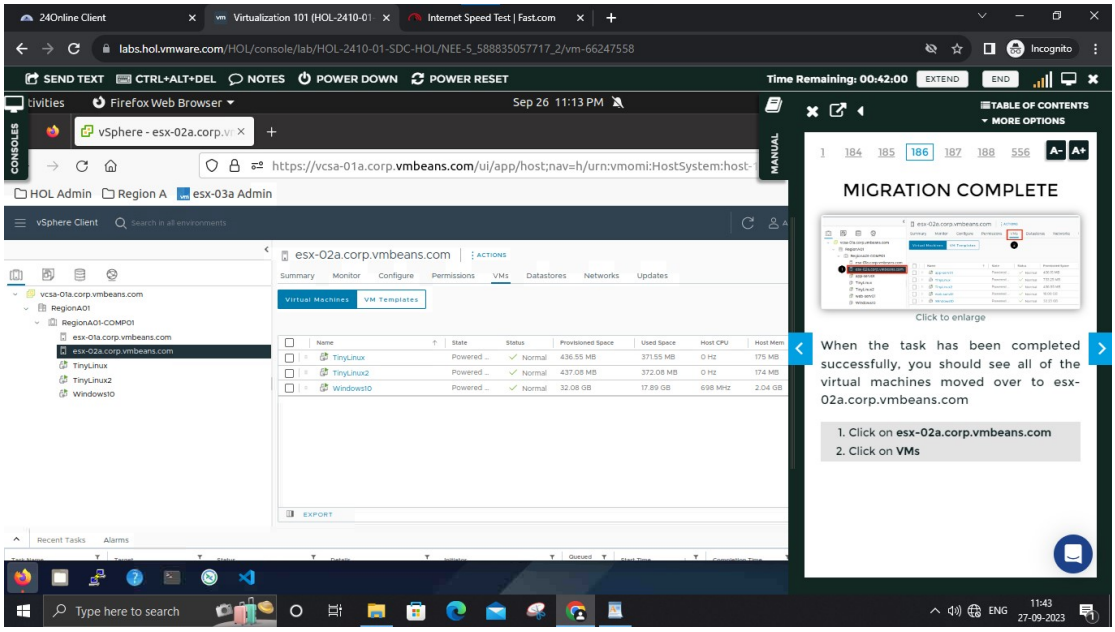


Review the settings and click Finish to migrate the virtual machines to esx-02a.corp.vmbeans.com



Click on esx-02a.corp.vmbeans.com

Click on VMs



HERE all the migrated VMs are visible.
